

cubipack

Cubicool International offers a comprehensive range of packaged condensing units for chilling and freezing applications fitted with hermetic or semi-hermetic compressors.

The flexible modular structure allows for a range of options and stacking possibilities. Units are weatherproof with stackable corrosion-resistant frames, claddings and roofs. Extended bell-mouth fan cowls, generous condenser selections and enhanced air flow characteristics ensure optimal performance.

Units can be fitted with a wide range of refrigeration components and may be tailored to specific application or client requirements.

Cubicool International is committed to ensuring its products are designed, manufactured and assembled to operate in the most energy-efficient manner possible, using the latest available technologies and design methodologies in keeping with best industry practice
